Subject Index for Volume 15

Acebutolol treatment
renin measurement and saralasin test and, value of, in hypertension 176
Acetate transfer
across membranes of artificial kidneys in vitro . . 593
Acid-base changes
interactions of, and furosemide on tubular calcium transport (abst) 587
Acid-base disturbances
divergent, in patients with advanced chronic renal failure (abst) 451
Acidemia
methylmalonic 311
Acidosis
acute, early changes in renal metabolites profile during, in dogs and rats (abst) 715
effects of metabolic, and alkalosis on sodium and calcium transport in dog kidney 520
hypercapnic, effect on renal water excretion in dog 116
pathogenesis of, and hypokalemia in hereditary fructose intolerance (abst) 714
tubular, *see* Tubular acidosis
Acute renal failure, *see* Renal failure, acute
Adenylate cyclase
hormone-sensitive, along nephron of genetically hypophosphatemic mice 357
Adrenal hormone
angiotensin as S-29
Adrenergic and renin-angiotensin systems
in rats, feedback regulation of nephron filtration rate and 473
Adrenocorticotrophic hormone
and indomethacin effect on renal function in man . 62
Aldosterone
age versus urinary sodium for judging renin and catecholamine and (abst) 588
dissociation of diurnal variation of, and cortisol in anephric subjects 669
inhibition of sodium-retaining effect of, by thyroid hormone (abst) 584
plasma, potassium chloride effect on plasma renin activity and, during sodium restriction in normal man 286
Alkalosis
effects of metabolic acidosis and, on sodium and calcium transport in dog kidney 520
Allograft, renal, *see* Renal allografts
Allotransplants, renal cadaver
membranous glomerulonephritis in (abst) 583
Alpha-adrenoceptor blockade
effects of chronic beta and, with labetalol in hypertension (abst) 586
Ambulatory peritoneal dialysis, *see* Dialysis, continuous ambulatory peritoneal
Amikacin
kinetics of, in renal parenchyma (abst) 585
Amino acid-mediated stimulation
of renal phospholipid biosynthesis after acute tubular necrosis 542
Aminoglycosides
tubular transport mechanisms of (abst) 449
Ammoniagenesis, renal, *see* Renal ammoniagenesis
Ammonium renal transport
micropuncture study of relationship between potassium and (abst) 585
Anemia
erythropoietin effect on, of peritoneally dialyzed anephric rats 370
microangiopathic hemolytic, *see* Hemolytic-uremic syndrome
Anephric rats
erythropoietin effect on anemia of peritoneally dialyzed 370
Angiography
of arteriovenous hemodialysis fistulas (abst) . . . 447
Angiotensin
as renal, adrenal, and cardiovascular hormone . .S-29
Angiotensin blockade
by saralasin bolus injection S-53
Angiotensin-converting enzyme inhibitor
oral, for treatment of hypertension (abst) 585
Angiotensin II
structural features of S-3
Angiotensin system, renin-, *see* Renin-angiotensin system
Angiotensin II blockade
baroreceptor-mediated renin release and S-60
by saralasin in evaluation of hypertension in children S-75
Angiotensin II profiling
with saralasin S-115
Angiotensins I and II
in renal vein blood 276
Antibody(ies)
detection of antidonor (abst) 709
different ability to produce, to heterologous tubular and glomerular basement membranes in two strains of mice (abst) 449
Anticoagulation
dialysis without (abst) 447
Antidiuresis
an experimental model of inappropriate 62
Antihepatitis-B
hepatitis-B prevention with immunoglobulin (abst) 588
Antilymphocyte globulin
in renal transplantation (abst) 709
Arterioles
reactivity of glomerular afferent and efferent, in renal hypertension 109
Arteriovenous hemodialysis fistulas
angiography of (abst) 447

Arthritis, rheumatoid
unusual incidence of membranous glomerulonephritis after gold therapy for (abst) 584
Autoimmune response
against glomerular basement membrane in inbred rats (abst) 105
Autoradiography
of gentamicin uptake by rat proximal tubule cell . 335
Azathioprine
failure of immunosuppression with, to improve cadaveric allograft survival (abst) 711

Bartter's syndrome
platelet hyporesponsiveness to epinephrine in carriers of (abst) 713
Basement membrane
abnormalities in three congenital renal diseases (abst) 448
antiglomerular, antibody-induced glomerulonephritis after solvent exposure (abst) 450
disaccharide units in Masugi nephritis, excretion and synthesis of (abst) 453
glomerular
different ability to produce antibodies to heterologous tubular and, in two strains of mice (abst) 449
in inbred rats, autoimmune response against (abst) 105
theophylline influence on ferritin pathway through, in rat (abst) 447
nephropathies induced in rabbits by antibodies directed against renal (abst) 452
study of tubular, deposits after human renal transplantation (abst) 452
Basement membrane matrix
biosynthesis of, by isolated rate renal glomeruli . 20
Benzolamide
microelectrode determination of pH and Pco_2 in rat proximal tubule after 624
Beta-adrenergic receptors
in rat kidneys (abst) 581
Beta-adrenoceptor blockade
effects of chronic alpha- and, with labetalol in hypertension (abst) 586
with pindolol 661
Bicarbonate reabsorption
glomerulotubular balance for, during carbonic anhydrase inhibition in dog (abst) 711
Biosynthesis
of basement membrane matrix by isolated rat renal glomeruli 20
Bleeding after renal biopsy
use of computerized tomography to evaluate (abst) 712
Blood, renal vein
angiotensins I and II in 276
Blood flow, glomerular, *see* Glomerular blood flow
Blood flow distribution, intrarenal
dopamine effects on canine, during hemorrhage . 219
Blood pressure response
increased, to static exercise in hypertensive offspring (abst) 582
physiologic definition of, to renal revascularization in patients with renovascular hypertension . . .S-83

Bone mineralization
greater effect of 25-hydroxycholecalciferol on . . 196

Calciferol
reversible proximal myopathy in renal osteodystrophy after (abst) 106
Calcium
fasting urine (abst) 715
protein-bound, hemodialysis effects on 283
Calcium ATPase activity
duodenal mucosal, in uremic rats (abst) 588
Calcium dialysate
during chronic hemodialysis, acute plasma parathormone fluctuations induced by varying (abst) 583
Calcium ion and hydrogen ion effect
on fibrinolytic activity of isolated renal glomeruli from rat 238
Calcium load test
in calcium nephrolithiasis (abst) 715
Calcium nephrolithiasis
calcium load test in (abst) 715
Calcium oxalate, *see also* Oxalate
inhibitory factors in urine (abst) 714
Calcium oxalate crystal formation
ultrastructural events in early, in rats 640
Calcium transport
effects of metabolic acidosis and alkalosis on sodium and, in dog kidney 520
interactions of acid-base changes and furosemide on tubular (abst) 587
Captopril
renin system blockade by (abst) 588
Carbonic anhydrase inhibition
glomerulotubular balance for bicarbonate reabsorption during, in dog (abst) 711
Cardiac allograft rejection and prolongation
relationship of intra major histocompatibility complex differences to, in rat (abst) 711
Cardiovascular hormone
angiotensin as S-29
Catecholamines
age versus urinary sodium for judging renin and aldosterone and (abst) 588
labetalol effects on, in hypertension (abst) 586
plasma
in hypertensive DOCA-salt rats (abst) 451
renin and age and (abst) 586
Chronic renal failure, *see* Renal failure, chronic
Collecting duct hydrogen ion secretion
effects of mineralocorticoids and potassium on, in rabbit (abst) 714
Complement
serum, profile 396
Complement receptors, glomerular
binding of soluble immune complexes to human . 303
Computerized tomography
use of, to evaluate bleeding after renal biopsy (abst) 712
Conduction velocity, motor nerve
absence of increased, after parathyroidectomy in dialysis patients (abst) 449
Continuous ambulatory peritoneal dialysis, *see* Dialysis, continuous ambulatory peritoneal

Contraceptive therapy, oral
cortical necrosis with irreversible renal failure in course of (abst) . . . 453
Converting enzyme inhibitor
comparison between saralasin and, in hypertensive disease . . . S-107
Cortical necrosis
with irreversible renal failure in course of oral contraceptive therapy (abst) . . . 453
Cortisol
dissociation of diurnal variation of aldosterone and, in anephric subjects . . . 669
Cryoglobulinemia
and kidney lesions (abst) . . . 581
Cyclic nucleotides
action of serotonin on, in glomeruli of rat renal cortex . . . 463
Cyclophosphamide
failure of immunosuppression with, to improve cadaveric allograft survival (abst) . . . 711
Cysts, tubular kidney
chemical amplification and reversal of (abst) . . . 710
Cytolysis, liver
drug-induced, in hemodialyzed patients (abst) . . 453

Dense deposits in transplanted kidneys
recurrence of . . . 386
Diabetes insipidus
neurogenic . . . 572
Diabetes mellitus
chronic peritoneal dialysis in patient with heart disease and . . . 698
Dialysis, *see also* Hemodialysis
absence of increased motor nerve conduction velocity after parathyroidectomy in, patients (abst) 449
without anticoagulation (abst) . . . 447
chronic peritoneal, in patient with diabetes mellitus and heart disease . . . 698
continuous ambulatory peritoneal (abst) . . . 584
first year's experience with (abst) . . . 713
. hematologic state of patients undergoing (abst) . 712
D1-2-ethylhexyl phthalate accumulation in (abst) . 712
hemodynamic changes during sequential ultrafiltration and . . . 411
treatment, regular, in elderly (abst) . . . 450
Dialysis solutions
microvascular and clinical effects of altered peritoneal . . . 630
Digoxin
loading dose of, in renal failure (abst) . . . 711
1,25-Dihydroxyvitamin D_3
effect on renal osteodystrophy (abst) . . . 713
tubular handling of phosphate in thyroparathyroidectomized rats treated with (abst) . . . 587
Disaccharide units
in Masugi nephritis, excretion and synthesis of basement membrane (abst) . . . 453
Disease, renal *see* Renal diseases
Diurnal variation
dissociation of, of aldosterone and cortisol in anephric subjects . . . 669
DOCA-salt rats
plasma catecholamine levels in hypertensive (abst) 451

Dopamine
effects on canine intrarenal blood flow distribution during hemorrhage . . . 219
Drug interactions with saralasin . . . S-101

Eaton Collaborative Study summary . . . S-115
Epinephrine
platelet hyporesponsiveness to, in carriers of Bartter's syndrome (abst) . . . 713
Epithelial cells, glomerular
in vitro incubation and study of kidney . . . 80
Epithelial surface of toad urinary bladder
vasopressin-induced changes in (abst) . . . 448
Erythropoietin
effect on anemia of peritoneally dialyzed anephric rats . . . 370
Escherichia coli
glomerulonephritis induced in mouse by (abst) . . 450
Essential hypertension, *see* Hypertension, essential
Estrogen-associated hypertension, *see* Hypertension, estrogen-associated
D1-2-Ethylhexyl phthalate accumulation
in dialyzed uremic patients (abst) . . . 712
Exercise, static
increased blood pressure response to, in hypertensive offspring (abst) . . . 582
Extracellular fluid volume
determination of, in uremic patients by oral administration of radiosulfate . . . 71

Failure, renal, *see* Renal failure
Fasting urine calcium (abst) . . . 715
Feedback regulation
of nephron filtration rate during pharmacologic interference with renin-angiotensin and adrenergic systems in rats . . . 473
Ferritin pathway
theophylline influence on, through glomerular basement membrane in rat (abst) . . . 447
Fibrinolytic activity
of isolated renal glomeruli from rat, calcium and hydrogen ion effect on . . . 238
Fibroblast target cells
advantages of (abst) . . . 709
Fistulas
angiography of arteriovenous hemodialysis (abst) 447
Fluorescence pattern
nonspecific, diffuse total extracapillary (crescentic) glomerulonephritis with (abst) . . . 105
Fluorocitrate
effects on renal ammoniagenesis and glutamine metabolism in intact dog . . . 255
Focal segmental glomerular hyalinosis
and sclerosis in membranous glomerulopathy (abst) . . . 104
Formalin
improved technique for removal of, from hemodialyzers (abst) . . . 452
Fructose intolerance, hereditary
pathogenesis of acidosis and hypokalemia in (abst) 714
Furosemide
interactions of acid-base changes and, on tubular calcium transport (abst) . . . 587

Gentamicin
-induced acute renal failure, mechanism involved in (abst) . . . 445
pharmacokinetics of, in treatment of renal infection . . . 160
uptake, autoradiography of, by rat proximal tubule cell . . . 335
urinary excretion and tissue accumulation of, and paraaminohippurate in postischemic rat kidneys 618
Glafenin
acute renal insufficiency following intoxication by (abst) . . . 449
Glomerular afferent and efferent arterioles
reactivity of, in renal hypertension . . . 109
Glomerular basement membrane, *see* Basement membrane, glomerular
Glomerular blood flow
in rabbits and rats, measurement of . . . 126
Glomerular complement receptors
binding of soluble immune complexes to human . 303
Glomerular epithelial alterations
resulting from sialic acid surface coat removal . . 376
Glomerular epithelial cells
in vitro incubation and study of kidney . . . 80
Glomerular filtration dynamics
in dog during elevated plasma colloid osmotic pressure . . . 502
Glomerular hemodynamics
computed from dimensions of reconstructed glomerular model (abst) . . . 714
Glomerular hyalinosis
focal segmental, and sclerosis in membranous glomerulopathy (abst) . . . 104
Glomerular model
glomerular hemodynamics computed from dimensions of reconstructed (abst) . . . 714
Glomerular ultrafiltration
changes of hemodynamics and, in renal hypertension of rats . . . 134
Glomeruli, renal, rat
action of serotonin on cyclic nucleotides in . . . 463
biosynthesis of basement membrane matrix by isolated . . . 20
calcium and hydrogen ion effect on fibrinolytic activity of isolated . . . 238
Glomerulonephritis
antiglomerular basement membrane antibody-induced, after solvent exposure (abst) . . . 450
crescentic, without immune deposits . . . 184
diffuse total extracapillary (crescentic), with nonspecific fluorescence pattern (abst) . . . 105
idiopathic forms of, circulating immune complexes in patients with (abst) . . . 712
induced in mouse by *Escherichia coli* (abst) . . . 450
membranoproliferative, nonimmunoglobulin C3 activating factor in . . . 294
membranous
clinicopathologic correlations in experimental (abst) . . . 709
in renal cadaver allotransplants (abst) . . . 583
unusual incidence of, after gold therapy for rheumatoid arthritis (abst) . . . 584
murine immune complex, reticuloendothelial and mesangial function in . . . 144
poststreptococcal (abst) . . . 712
Glomerulopathy, membranous, *see* Membranous glomerulopathy
Glomerulotubular balance
for bicarbonate reabsorption during carbonic anhydrase inhibition in dog (abst) . . . 711
Glutamine metabolism
in intact dog, fluorocitrate effects on renal ammoniagenesis and . . . 255
Glycerol-induced acute renal failure
in rat, role of renin in enhancement of (abst) . . . 451
Gold therapy
unusual incidence of membranous glomerulonephritis after, for rheumatoid arthritis (abst) . . . 584
Growth
protein diet effects on, of uremic rats . . . 534

Heart disease
chronic peritoneal dialysis in patient with diabetes mellitus and . . . 698
Hemodialysis, *see also* Dialysis
blockade of renin system by captopril in (abst) . . 588
chronic, acute plasma parathormone fluctuations induced by varying calcium dialysate during (abst) . . . 583
comparison of elderly versus young population groups on regular, treatment (abst) . . . 581
development of hemoperfusion system for phosphate removal during (abst) . . . 581
drug-induced liver cytolysis and (abst) . . . 453
effects on protein-bound calcium . . . 283
hemodynamic study before and after water and salt depletion by (abst) . . . 448
hepatitis-B prevention with immunoglobulin anti-hepatitis-B in (abst) . . . 588
long-term, taste acuity in patients undergoing . . . 49
maintenance, results obtained with ultrafiltration control monitor in patients treated by (abst) . . 453
prostacyclin effect on platelets in (abst) . . . 447
Hemodialysis fistulas
angiography of arteriovenous (abst) . . . 447
Hemodialyzers
improved technique for removal of formalin and other toxic elements from (abst) . . . 452
Hemodynamic and metabolic evidence
of salt sensitivity in spontaneously hypertensive rats . . . 33
Hemodynamic changes
during sequential ultrafiltration and dialysis . . . 411
Hemodynamic correlates
of saralasin . . . S-68
Hemodynamic study
before and after water and salt depletion by hemodialysis (abst) . . . 448
Hemodynamics, *see also* Renal hemodynamics
changes of, and glomerular ultrafiltration in renal hypertension of rats . . . 134
computed from dimensions of reconstructed glomerular model (abst) . . . 714
effects of 24-hour unilateral ureteral obstruction on glomerular, in rat kidney . . . 457

Hemofiltration
treatment of chronic renal failure by, with regeneration of ultrafiltrate on sorbents before reinjection (abst) 448
Hemolytic anemia, microangiopathic, *see* Hemolytic-uremic syndrome
Hemolytic-uremic syndrome
adult, successfully treated by plasma exchange (abst) 453
prognostic importance of vascular lesions in acute renal failure with 548
recurrent (abst) 453
Hemoperfusion system
development of, for phosphate removal during hemodialysis (abst) 581
influence of, on concentration of β-methyldigoxin and hormones in plasma 404
Hemorrhage
dopamine effects on canine intrarenal blood flow distribution during 219
Hepatitis-B prevention
with immunoglobulin antihepatitis-B in hemodialysis (abst) 588
Hepatorenal syndrome
portacaval or peritoneovenous shunt effects on renin in 54
Heymann's nephritis
kinetics of preformed immune complexes infused into rats with (abst) 713
Histocompatibility complex differences
relationship of intra, to cardiac allograft rejection and prolongation in rat (abst) 711
Hormones
influence of hemoperfusion on concentration of β-methyldigoxin and, in plasma 404
Hyalinosis, glomerular
focal segmental, and sclerosis in membranous glomerulopathy (abst) 104
Hydrochlorothiazide
acute effects of, on urinary electrolyte excretion in calcareous renal stone formers (abst) 715
changes in renal hemodynamics during treatment of essential hypertension with (abst) 105
Hydrogen ion and calcium ion effect
on fibrinolytic activity of isolated renal glomeruli from rat 238
Hydrogen ion secretion
collecting duct, effects of mineralocorticoids and potassium on (abst) 714
evidence for 624
Hydronephrosis
congenital unilateral, in rat 567
1α-Hydroxycholecalciferol
comparison of, and 25-hydroxycholecalciferol in treatment of renal osteodystrophy 196
25-Hydroxycholecalciferol
comparison of, and 1 α-hydroxycholecalciferol in treatment of renal osteodystrophy 196
5-Hydroxytryptamine, *see* Serotonin
Hypercalciuria
idiopathic, in childhood (abst) 582
Hypercapnic acidosis
effect on renal water excretion in dog 116
Hyperoxaluria
plasma level and renal clearance of oxalate in patients with primary (abst) 446
Hyperparathyroidism
reversal of, in response to dietary phosphorus restriction in uremic dog 43
Hyperphosphatemic acute renal failure
following therapy of lymphosarcoma (abst) 450
Hypertension
angiotensin II blockade by saralasin in evaluation of, the children S-75
in chronic hemodialyzed patients (abst) 448
elevated taste threshold for salt in (abst) 582
essential
changes in renal hemodynamics during treatment of, with hydrochlorothiazide (abst) . . . 105
dietary sodium during treatment of, with thiazide diuretics (abst) 583
renin type of, and age (abst) 586
and secondary, responses to saralasin in normal man and in S-29
estrogen-associated, study of plasma renin activity and sodium excretion in normotensive subjects with previous (abst) 445
human, saralasin in S-36
increased blood pressure response to static exercise in (abst) 582
labetalol effects on catecholamines and renal function in (abst) 586
oral angiotensin-converting enzyme inhibitor for treatment of (abst) 585
pregnancy-associated, study of plasma renin activity and sodium excretion in normotensive subjects with previous (abst) 445
renal, *see* Renal hypertension
renin-angiotensin system and 427
renovascular, physiologic definition of blood pressure response to renal revascularization in patients with S-83
responsiveness in S-68
uncontrollable, blockade of renin system by captopril in (abst) 588
value of renin measurement, saralasin test, and acebutolol treatment in 176
Hypertensive disease
comparison between saralasin and converting enzyme inhibitor in S-107
Hypertensive DOCA-salt rats
plasma catecholamine levels in (abst) 451
Hypertensive rats, spontaneously
hemodynamic and metabolic evidence of salt sensitivity in 33
Hyperthyroid rats
parathyroid-independent change in renal handling of phosphate in 325
Hypokalemia
pathogenesis of acidosis and, in hereditary fructose intolerance (abst) 714
Hypokalamic myopathy
with rhabdomyolysis and acute renal failure in course of chronic licorice ingestion (abst) . . . 452
Hypophosphatemic mice
hormone-sensitive adenylate cyclase along neph-

ron of genetically 357
Hypoxemia
pathophysiologic renal changes during, in rabbit (abst) 585

IgA nephropathy study (abst) 709
Immune complexes
binding of soluble, to human glomerular complement receptors 303
circulating, in patients with idiopathic forms of glomerulonephritis (abst) 712
kinetics of preformed, infused into rats with Heymann's nephritis (abst) 713
Immune deposits
crescentic glomerulonephritis without 184
Immunosuppression
failure of, with cyclophosphamide, azathioprine, and prednisone to improve cadaveric allograft survival (abst) 711
Inbred rats
autoimmune response against glomerular basement membrane in (abst) 105
Indomethacin
and adrenocorticotrophic hormone effect on renal function in man 62
Infection, renal, *see* Renal infection
Intrarenal blood flow distribution
dopamine effects on canine, during hemorrhage . 219

Kidney(s)
artificial, acetate transfer across membranes of, in vitro 593
exchanged, retrospective correlation of clinical and histologic findings of 189 559
remnant, medullary collecting duct function in . . 487
role in silicon metabolism in man (abst) 445
transplanted, *see* Renal transplantation
Kidney cortex
binding of tritiated human parathyroid hormone to cellular membranes from rat (abst) 451
Kidney lesions
cryoglobulinemia and (abst) 581

Labetalol
effects of chronic alpha and beta adrenoceptor blockage with, in hypertension (abst) 586
Lactic dehydrogenase isoenzyme 5
urinary, and urinary tract infection in children (abst) 447
Licorice ingestion, chronic
hypokalemic myopathy with rhabdomyolysis and acute renal failure in course of (abst) 452
Liver cytolysis
drug-induced, in hemodialyzed patients (abst) . . 453
Lymphosarcoma
hyperphosphatemic acute renal failure following therapy of (abst) 450
Lysozyme
in rat, renal handling of 246

Maintenance hemodialysis, *see* Hemodialysis, maintenance
Masugi nephritis
excretion and synthesis of basement membrane disaccharide units in (abst) 453
Medullary collecting duct function
in remnant kidney before and after volume expansion 487
Membranoproliferative glomerulonephritis, *see* Glomerulonephritis, membranoproliferative
Membranous glomerulonephritis, *see* Glomerulonephritis, membranous
Membranous glomerulopathy
focal segmental glomerular hyalinosis and sclerosis in (abst) 104
Membranous nephropathy
pathogenesis and treatment of 88
Mercuric chloride-induced acute renal failure
in awake rats, pathophysiology of (abst) 104
renal mercury content in (abst) 587
Mesangial and reticuloendothelial function
in murine immune complex glomerulonephritis . . 144
Metabolic and hemodynamic evidence
of salt sensitivity in spontaneously hypertensive rats 33
β-Methyldigoxin
influence of hemoperfusion on concentration of, and hormones in plasma 404
Methylmalonic acidemia 311
Microangiopathic hemolytic anemia, *see* Hemolytic-uremic syndrome
Micropuncture study
of relationship between potassium and ammonium renal transport (abst) 585
Mineralization, bone
greater effect of 25-hydroxycholecalciferol on . . 196
Mineralocorticoids
effects of, and potassium on collecting duct hydrogen ion secretion in rabbit (abst) 714
Motor nerve conduction velocity
absence of increased, after parathyroidectomy in dialysis patients (abst) 449
Moya-Moya syndrome
and renal artery stenosis (abst) 450
Myopathy
reversible proximal, in renal osteodystrophy after calciferol (abst) 106

Natriuretic factor
action on isolated perfused rat kidney (abst) . . . 448
in rat renal tissue following acute expansion (abst) 586
Necrosis, papillary
functional characterization of drug-induced experimental 264
Nephritic factor
serum, profile 396
Nephritis
Heymann's, kinetics of preformed immune complexes infused into rats with (abst) 713
Masugi, excretion and synthesis of basement membrane disaccharide units in (abst) 453
Nephrolithiasis, calcium
calcium load test in (abst) 715
Nephrology
a look into the future 1
Nephron
hormone-sensitive adenylate cyclase along, of genetically hypophosphatemic mice 357

Nephron filtration rate
feedback regulation of 473
Nephron obstruction
in nordihydroguaiaretic acid-induced renal cystic disease 7
Nephron segments
connecting tubule: functional subdivision of rabbit distal 346
Nephropathy
IgA, study (abst) 709
induced in rabbits by antibodies directed against renal basement membranes (abst) 452
membranous, *see* Membranous nephropathy
Nephrotoxic agents
urinary enzyme excretion induced by, in rats (abst) 582
Neurogenic diabetes insipidus 572
Nonimmunoglubulin C3 activating factor
in membranoproliferative glomerulonephritis . . . 294
Nordihydroguaiaretic acid-induced renal cystic disease
nephron obstruction in 7
Norepinephrine-induced acute renal failure
study of factors which modify development of, in dog 227
Normotensive subjects
with previous hypertension, study of plasma renin activity and sodium excretion in (abst) 445
Nucleotides, cyclic, *see* Cyclic nucleotides

Oral contraceptive therapy
cortical necrosis with irreversible renal failure in course of (abst) 453
Osmotic pressure
glomerular filtration dynamics in dog during elevated plasma colloid 502
Osteodystrophy, renal, *see* Renal osteodystrophy
Oxalate, *see also* Calcium oxalate
effect of paraaminohippurate on renal transport of 38
plasma level and renal clearance of, in normal subjects and in patients with primary hyperoxaluria and/or chronic renal failure (abst) 446

Papillary necrosis
functional characterization of drug-induced experimental 264
Paraaminohippurate
effect of, on renal transport of oxalate 38
urinary excretion and tissue accumulation of, and gentamicin in postischemic rat kidneys 618
Parathormone fluctuations
acute plasma, induced by varying calcium dialysate during chronic hemodialysis (abst) 583
Parathyroid hormone
binding of tritiated human, to cellular membranes from rat kidney cortex (abst) 451
Parathyroid-independent change
in renal handling of phosphate in hyperthyroid rats 325
Parathyroid resistance
in acute renal failure caused by phosphate retention (abst) 714
Parathyroidectomy
absence of increased motor nerve conduction velocity after, in dialysis patients (abst) 449

Peritoneal dialysis, *see* Dialysis, continuous ambulatory peritoneal
Peritoneovenous shunt or portacaval shunt effects
on renin in hepatorenal syndrome 54
pH-dependence
of water and solute transport in toad urinary bladder 513
Phenacetin-containing analgesics
urorenal disorders and (abst) 587
Phosphate
parathyroid-independent change in renal handling of, in hyperthyroid rats 325
tubular handling of, in thyroparathyroidectomized rats (abst) 587
Phosphate removal
during hemodialysis, development of hemoperfusion system for (abst) 581
Phosphate retention
parathyroid resistance in acute renal failure caused by (abst) 714
Phosphate transport
renal (abst) 583
Phosphorus
restriction in uremic dog, reversal of hyperparathyroidism in response to dietary 43
Pindolol
beta blockade with 661
Plasma
influence of hemoperfusion on concentration of β-methyldigoxin and hormones in 404
Plasma aldosterone, *see* Aldosterone, plasma
Plasma catecholamines, *see* Catecholamines, plasma
Plasma colloid osmotic pressure
glomerular filtration dynamics in dog during elevated 502
Plasma exchange
adult hemolytic-uremic syndrome successfully treated by (abst) 453
Plasma kinetics
in beta blockade with pindolol 661
Plasma renin, *see* Renin, plasma
Platelet hyporesponsiveness
to epinephrine in carriers of Bartter's syndrome (abst) 713
Platelets
prostacyclin effect on, in hemodialysis (abst) . . . 447
Portacaval shunt or peritoneovenous shunt effects
on renin in hepatorenal syndrome 54
Poststreptococcal glomerulonephritis (abst) 712
Potassium
effects of mineralocorticoids and, on collecting duct hydrogen ion secretion in rabbit (abst) . . . 714
intravenous, disposition of, in anuric man 651
Potassium chloride
effect on plasma renin activity and plasma aldosterone during sodium restriction in normal man . 286
Potassium renal transport
micropuncture study of relationship between ammonium and (abst) 585
Prednisone
failure of immunosuppression with, to improve cadaveric allograft survival (abst) 711
Pregnancy-associated hypertension, *see* Hypertension, pregnancy-associated

Procoagulant, urinary
localization of, in human kidney 612
Prostacyclin
effect on platelets in hemodialysis (abst) 447
Prostaglandins
absence of relationship between natriuretic factor and (abst) 448
radioimmunoassay for urinary (abst) 584
Protein-bound calcium
hemodialysis effects on 283
Protein diet
effects on growth, renal function, and survival of uremic rats 534
Proximal tubule
microelectrode determination of pH and Pco_2 in rat, after benzolamide 624
Purine metabolism
and urolithiasis (abst) 452

Radioimmunoassay
for urinary prostaglandins (abst) 584
Radiosulfate, *see also* Sulfate
determination of extracellular fluid volume in uremic patients by oral administration of 71
Rats, hypertensive, *see* Hypertensive rats
Rejection, renal allograft, *see* Renal allograft rejection
Renal allograft rejection
rhythms in (abst) 446
Renal allograft survival
failure of immunosuppression with cyclophosphamide and azathioprine and prednisone to improve cadaveric (abst) 711
Renal allografts
donor-specific suppressor cells in human (abst) . . 710
Renal ammoniagenesis
fluorocitrate effects on, and glutamine metabolism in intact dog 255
Renal artery stenosis
Moya-Moya syndrome and (abst) 450
Renal biopsy
use of computerized tomography to evaluate bleeding after (abst) 712
Renal cadaver allotransplants
membranous glomerulonephritis in (abst) 583
Renal changes
pathophysiologic, during hypoxemia in rabbit (abst) 585
Renal clearance
of oxalate in normal subjects and in patients with primary hyperoxaluria and/or chronic renal failure (abst) 446
Renal cortex
action of serotonin on cyclic nucleotides in glomeruli of rat 463
Renal cystic disease
nephron obstruction in nordihydroguaiaretic acid-induced 7
Renal disease, end-stage
use of saralasin in S-93
Renal diseases
basement membrane abnormalities in three congenital (abst) 448
end-stage, studies of sulfate in 167

Renal failure
acute 205
hyperphosphatemic, following therapy of lymphosarcoma (abst) 450
hypokalemic myopathy with rhabdomyolysis and, in course of chronic licorice ingestion (abst) 452
mechanism involved in gentamicin-induced (abst) 445
mercuric chloride-induced, *see* Mercuric-chloride induced acute renal failure
norepinephrine-induced, study of factors which modify development of, in dog 227
parathyroid resistance in, caused by phosphate retention (abst) 714
pathophysiology of mercuric chloride-induced, in awake rats (abst) 104
prognostic importance of vascular lesions in . . 548
renal mercury content in mercuric chloride-induced (abst) 587
role of renin in enhancement of glycerol-induced, in rat (abst) 451
chronic
advanced, divergent acid-base disturbances in patients with (abst) 451
incidence of tubular acidosis in patients with (abst) 104
plasma level and renal clearance of oxalate in normal subjects and in patients with (abst) . . 446
renal osteodystrophy in childhood as common complication of (abst) 711
treatment of, by hemofiltration with regeneration of ultrafiltrate on sorbents before reinjection (abst) 448
human renal fluoride excretion alterations in (abst) 588
irreversible, cortical necrosis with, in course of oral contraceptive therapy (abst) 453
loading dose of digoxin in (abst) 711
Renal fluoride
excretion, human (abst) 588
Renal function
chronic vascular constrictions and measurements of, in conscious rats 419
indomethacin and adrenocorticotrophic hormone effect on, in man 62
labetalol effects on, in hypertension (abst) 586
protein diet effects on, of uremic rats 534
Renal glomeruli, *see* Glomeruli, renal
Renal handling
of lysozyme in rat 246
of phosphate in hyperthyroid rats, parathyroid-independent change in 325
Renal hemodynamics, *see also* Hemodynamics
changes in, during treatment of essential hypertension with hydrochlorothiazide (abst) 105
Renal hormone
angiotensin a- S-29
Renal hypertension
changes of hemodynamics and glomerular ultrafiltration in, of rats 134
reactivity of glomerular afferent and efferent arterioles in 109
Renal infection
pharmacokinetics of gentamicin in treatment of . . 160

Renal insufficiency
acute, following intoxication by glafenin (abst) . . 449
Renal lesions
in Rothmund-Thomson disease (abst) 448
Renal mercury content
in mercuric chloride-induced acute renal failure (abst) 587
Renal metabolites profile
early changes in, during acute acidosis in dogs and rats (abst) 715
Renal osteodystrophy
after calciferol, reversible proximal myopathy in (abst) 106
in childhood (abst) 711
comparison of 1α-hydroxycholecalciferol and 25-hydroxycholecalciferol in treatment of renal osteodystrophy 196
early detection and treatment of (abst) 710
effect of 1,25-dihydroxyvitamin D_3 on (abst) . . . 713
Renal parenchyma
kinetics of amikacin in (abst) 585
Renal phosphate transport (abst) 583
Renal phospholipid biosynthesis
amino acid-mediated stimulation of, after acute tubular necrosis 542
Renal potassium conservation
mechanism of, in rat 601
Renal revascularization
physiologic definition of blood pressure reponse to, in patients with renovascular hypertension .S-83
Renal stone formers
acute effects of hydrochlorothiazide on urinary electrolyte excretion in calcareous (abst) 715
Renal transplantation
antilymphocyte globulin in (abst) 709
dense deposits and, recurrence of 386
study of tubular basement membrane deposits after human (abst) 452
Renal transport
micropuncture study of relationship between potassium and ammonium (abst) 585
of oxalate, effect of paraaminohippurate on 38
Renal vein
renin measurements in normotensive children (abst) 446
Renal vein blood
angiotensins I and II in 276
Renal water excretion
in dog, hypercapnic acidosis effect on 116
Renin
age versus urinary sodium for judging aldosterone and catecholamine and (abst) 588
evidence for baroreceptor-mediated S-60
plasma
activation of, of normal rats (abst) 587
potassium chloride effect on, activity and plasma aldosterone during sodium restriction in normal man 286
study of, activity and sodium excretion in normotensive subjects with previous hypertension (abst) 445
portacaval or peritoneovenous shunt effects on, in hepatorenal syndrome 54
renal vein, measurements in normotensive children (abst) 446
role in enhancement of glycerol-induced ARF in rat (abst) 451
type of essential hypertension and age (abst) . . . 586
Renin-angiotensin and adrenergic systems in rats
feedback regulation of nephron filtration rate and . 473
Renin-angiotensin system
and hypertension 427
Renin measurement
saralasin test and acebutolol treatment and, value of, in hypertension 176
Renin system
blockade by captopril (abst) 588
Renovascular hypertension
physiologic definition of blood pressure response to renal revascularization in patients with . . .S-83
Reticuloendothelial and mesangial function
in murine immune complex glomerulonephritis . . 144
Rhabdomyolysis
hypokalemic myopathy with, and acute renal failure in course of chronic licorice ingestion (abst) 452
Rheumatoid arthritis
unusual incidence of membranous glomerulonephritis after gold therapy for (abst) 584
Rhythms in renal allograft rejection (abst) 446
Rothmund-Thomson disease
renal lesions in (abst) 448

Salt
elevated taste threshold for, in hypertensive subjects (abst) 582
Salt depletion
hemodynamic study before and after water and, by hemodialysis (abst) 448
Salt sensitivity
hemodynamic and metabolic evidence of, in spontaneously hypertensive rats 33
Saralasin
angiotensin II blockade by, in evaluation of hypertension in children S-75
angiotensin II profiling with S-115
comparison between converting enzyme inhibitor and, in hypertensive disease S-107
drug interactions with S-101
hemodynamic correlates of S-68
historical development of S-7
in human hypertension S-36
outpatient experience with S-44
physiologic studies with, in animals S-20
preclinical pharmacology of S-11
responses to, in normal man and in essential and secondary hypertension S-29
use in end-stage renal disease S-93
Saralasin bolus injection
angiotensin blockade by S-53
Saralsin test
renin measurement and acebutolol treatment and, value of, in hypertension 176
Sclerosis, glomerular
focal segmental, and hyalinosis in membranous glomerulopathy (abst) 104
Sensitivity, salt, *see* Salt sensitivity

Serotonin (5-hydroxytryptamine)
action of, on cyclic nucleotides in glomeruli of rat renal cortex 463
Serum complement, *see* Complement, serum
Serum nephritic factor, see Nephritic factor, serum
Sialic acid surface coat removal
glomerular epithelial alterations resulting from . . 376
Silicon metabolism
role of kidney in, in man (abst) 445
Sodium
dietary, restriction during treatment of essential hypertension with thiazide diuretics (abst) . . . 583
urinary, age versus, for judging renin, aldosterone, and catecholamine levels (abst) 588
Sodium balance
evidence for baroreceptor-mediated renin release and role of S-60
Sodium excretion
analytical techniques applied to study of, in dogs (abst) 446
study of plasma renin activity and, in normotensive subjects with previous hypertension (abst) 445
Sodium intake
natriuretic factor dependence on basal (abst) . . . 586
Sodium restriction
potassium chloride effect on plasma renin activity and plasma aldosterone during, in normal man . 286
Sodium-retaining effect of aldosterone
inhibition of, by thyroid hormone (abst) 584
Sodium transport
effects of metabolic acidosis and alkalosis on calcium and, in dog kidney 520
Solute transport
pH-dependence of water and, in toad urinary bladder 513
Solvent exposure
antiglomerular basement membrane antibody-induced glomerulonephritis after (abst) 450
Static exercise
increased blood pressure response to, in hypertensive offspring (abst) 582
Sulfate, *see also* Radiosulfate
studies on, in end-stage renal disease 167
Suppressor cells
donor-specific, in human renal allografts (abst) . . 710
Surface coat removal, sialic acid
glomerular epithelial alterations resulting from . . 376

Taste acuity
in patients undergoing long-term hemodialysis . . 49
Taste threshold
elevated, for salt in hypertensive subjects (abst) . 582
Theophylline influence
on ferritin pathway through glomerular basement membrane in rat (abst) 447
Thiazide diuretics
dietary sodium during treatment of essential hypertension with (abst) 583
Thyroid hormone
inhibition of sodium-retaining effect of aldosterone by (abst) 584
Thyroparathyroidectomized rats
tubular handling of phosphate in (abst) 587
Tissue accumulation
and urinary excretion of gentamicin and para-aminohippurate in postischemic rat kidneys . . 618
Transplantation, renal, *see* Renal transplantation
Tubular acidosis
incidence of, in patients with chronic renal failure (abst) 104
Tubular handling
of phosphate in thyroparathyroidectomized rats (abst) 587
Tubular kidney cysts
chemical amplification and reversal of (abst) . . . 710
Tubular necrosis
amino acid-mediated stimulation of renal phospholipid biosynthesis after acute 542
Tubular transport mechanisms
of aminoglycosides (abst) 449
Tubule
connecting: functional subdivision of rabbit distal nephron segments 346
Tubule cell
autoradiography of gentamicin uptake by rat proximal 335

Ultrafiltration
hemodynamic changes during sequential, and dialysis 411
Ultrafiltration control monitor
results obtained with (abst) 453
Uremia
clinical, quantitative indices of 676
Uremic patients
determination of extracellular fluid volume in, by oral administration of radiosulfate 71
Uremic rats
duodenal mucosal calcium ATPase activity in (abst) 588
Uremic syndrome, hemolytic-, see Hemolytic-uremic syndrome
Ureteral obstruction
effects of 24-hour unilateral, on glomerular hemodynamics in rat kidney 457
Urinary bladder
pH-dependence of water and solute transport in toad 513
vasopressin-induced changes in epithelial surface of toad (abst) 448
Urinary electrolyte excretion
acute effects of hydrochlorothiazide on, in calcareous renal stone formers (abst) 715
Urinary enzyme excretion
induced by nephrotoxic agents in rats (abst) . . . 582
Urinary excretion
and tissue accumulation of gentamicin and para-aminohippurate in postischemic rat kidneys . . 618
Urinary lactic dehydrogenase isoenzyme 5
and urinary tract infection in children (abst) . . . 447
Urinary procoagulant
localization of, in human kidney 612
Urinary tract infection
urinary lactic dehydrogenase isoenzyme 5 and (abst) 447

Urine
calcium oxalate inhibitory factors in (abst) 714
Urine calcium
fasting (abst) 715
Urolithiasis
change in incidence of childhood, in Israel over a 10-year period (abst) 582
childhood (abst) 586
environmental and genetic factors (abst) 710
in Newfoundland (abst) 710
purine metabolism and (abst) 452
Urorenal disorders
phenacetin-containing analgesics and (abst) . . . 587

Vascular constrictions, chronic
and measurements of renal function in conscious rats 419
Vasopressin-induced changes
in epithelial surface of toad urinary bladder (abst) 448
Volume expansion
medullary collecting duct function in remnant kidney before and after 487

Water depletion
hemodynamic study before and after salt and, by hemodialysis (abst) 448
Water excretion, renal
in dog, hypercapnic acidosis effect on 116
Water transport
pH-dependence of solute and, in toad urinary bladder 513
